DETAILED ACTION

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

2. The disclosure is objected to because of the following informalities: the specification should be amended to include the appropriate section headings listed above.

Appropriate correction is required.

3. The drawings are objected to because Figure 1 must be labeled – Prior Art--.
Also the various numbered elements should have suitable legends to identify what they are i.e. server 7; operating unit 2; etc.. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 14, “ the HTTP type “ lacks a proper antecedent basis.

Claim 1, line 21, “ the time slots “ lacks a proper antecedent basis.

Claim 1, line 24, “ the priority interchange “ lacks a proper antecedent basis.

Claim 2, line 5, “ the site bus type “ lacks a proper antecedent basis.

In claim 2, line 7 , it is unclear what element or elements the optionally is referring to. Also in claim 2, line 13, “ the HTTP server of a cluster unit “ lacks a clear antecedent basis. In claim 21, line 21, it is unclear which server is being referred to.

Claim 3, line 15, “ the HTTP/TCP/IP protocol “ lacks a proper antecedent basis.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Kastner 6,311,101.

Kastner teaches real time control using a server device of an industrial process , communication over the Internet using various protocols and the use of time slots. The server device additionally acts a server in a local area network. See the abstract; figures; col. 2, line13 to col. 3, line 21; col. 4, line 10 on.

8. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

9. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Royal, Jr. et al.6,360,137.

Royal et al. teach devices with servers on a local network which can be accessed remotely over the Internet and real time control of various functions. See the abstract; figures; col. 1, lines 8-18;col. 2, lines 5-67; col. 3, lines 1-31; col. 4, lines 4-67; col. 5, lines 17-58;col. 6, lines 1-11; col. 8, lines 1-67; and the claims.

Art Unit: 2125

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Edlund et al. 6,085,227 ; Papadopoulos et al. 6,484,061 ; and Eryurek 6,370,448 are all of interest in the use of devices with servers.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven R Garland whose telephone number is 703-305-9759. The examiner can normally be reached on Monday –Thursday from 6:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard, can be reached on (703) 308-0538.
